Information for Authors

MANUSCRIPTS: Manuscripts will be accepted for consideration for publication with the understanding that they are original, have never before been published, and are contributed solely to the *MARYLAND STATE MEDICAL JOURNAL*.

All manuscripts are acknowledged upon receipt and are followed up by notification of either acceptance or rejection. Rejected manuscripts are returned by regular mail. Accepted manuscripts become the property of the *JOURNAL* and are not returned. The *JOURNAL* is not responsible for loss of manuscripts through circumstances that are beyond its control.

Manuscripts should be addressed to: Editor, *MARYLAND STATE MEDICAL JOURNAL*, 1211 Cathedral St., Baltimore, Md. 21201.

SPECIFICATIONS: Manuscripts must be original typed copy, doublespaced throughout (including text, case reports, legends, tables and references) with margins of at least 1½ inches. Pages should be numbered consecutively.

The manuscript should include the title (brief and concise), the full name of the author (or authors) with degrees, academic and professional titles, affiliations, and any institutional or other credits. Please include a complete address where the author may receive proofs of his article for his approval and corrections.

All manuscripts should be accompanied by a carbon or xerox copy and the author should retain another copy for his records.

TABLES: Each table should be typed on a separate sheet of paper, be numbered, have a brief descriptive title, and its position in the text should be indicated.

Be sure that statistics are consistent in both tables and text.

REFERENCES: References should be limited to those citations noted in the text, and kept to a minimum of 18. (A complete review of the literature is rarely desirable.) The references must be typed, doublespaced, and are to be numbered consecutively as they appear in the text, with their positions in the text indicated. An alphabetized bibliography is used only when the listing is of books suggested for supplementary reading.

All references must be checked for absolute accuracy. Each journal reference must include author(s) and initials, complete title of article, name of publication, volume, first page of article,

and date. Complete dates (month, day, and year) are to be included with all references that have appeared within the last three years. Include with book references name of author(s) and/or editor(s) with initials, title of book, edition, location, publisher, year, volume (if given), and page. If reference is to a chapter within a book, include the author of the chapter (if different from author of the book), and the title of the chapter, if any.

ILLUSTRATIONS: Authors are urged to use the services of professional illustrators and photographers when possible. Drawings and charts should always be done in black ink on white paper. Clear, glossy photographs, black on white, should be submitted and such illustrations numbered consecutively and their positions indicated in the text.

Magnifications will be modified in proportion to the amount of reduction necessary to fit the pages of the *JOURNAL*. Please do not deface an illustration by writing on the front or the back, nor should it be taped or pasted to paper. The illustration may be pasted onto a piece of cardboard. Attached to the back of each illustration, chart or photograph should be the figure number, the author's name and the title of the article.

Legends for illustrations should be typewritten on a separate page with numbers corresponding to those on the photographs and drawings.

Recognizable photographs of patients are to be masked and should carry with them written permission for publication.

EDITORIAL RESPONSIBILITY: Manuscripts are subject to editorial modification and such revisions as are necessary to bring them into conformity with *JOURNAL* style.

Statements made or opinions expressed by any contributor in any article or feature published in the *JOURNAL* are the sole responsibility of the author.

PERMISSIONS: When material is reproduced from other sources, full credit must be given to both the author and publisher and written permission from these sources must be included when the material is submitted.

COPYRIGHT: Material that is published in the *MARYLAND STATE MEDICAL JOURNAL* is protected by copyright and may not be reproduced without the written permission of both the author and the *JOURNAL*.
